

# Decision Support for Energy Companies from Exploration to Distribution

Geocortex Essentials offers expertise and support in all areas of the energy sector, from evaluating a region's potential for deposits to supporting engineering design in pipeline construction. Geocortex helps you create mapping applications that offer geospatial data on demand. Manage pipeline networks and the production cycle, while ensuring the highest health and safety standards are met.

## Manager

Your control center. Everything configured in Geocortex can be done through Manager. Control all your sites and applications from one place.

## Instant Search

This extremely fast, indexed search capability displays results as you type. Results appear in order of relevance, helping you find what you need faster.

## Workflow

Streamline and automate even complex work processes, increasing efficiency and saving time.

## Reports & Charts

Quickly and easily produce reports that help you visualize and better use your data.

## Viewers

Our viewers offer a wealth of features and options that can help you do even more with your data. Easy-to-navigate design helps you make better decisions and take control of your information.
